

centers

observation map: every coupling, every seed, underlying main Fig. 1

seed 0 1 2 3 4 5

24-bin phase histogram, bin centres in standard notation · $N=17$ oscillators, 100 steps · gpt-5.4-mini · 24 runs, 40,800 calls, 100.0% valid

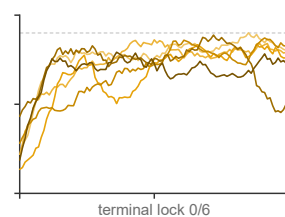

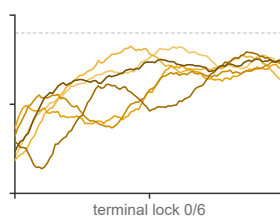

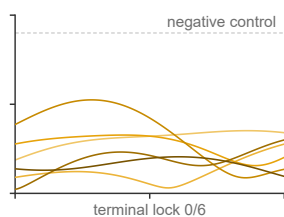

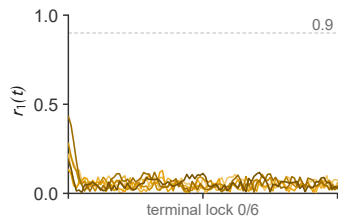

$K = -0.15$

$K = 0$

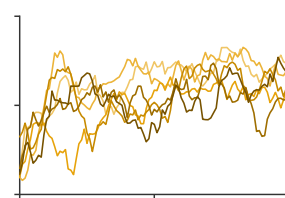

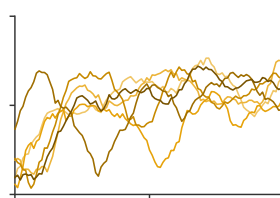

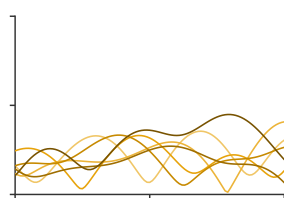

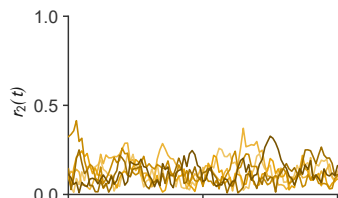

$K = 0.08$

$K = 0.15$

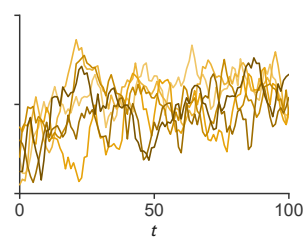

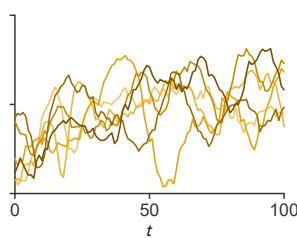

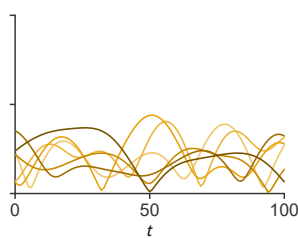

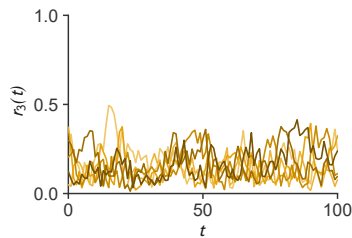

a Polar order

b Second harmonic

c Third harmonic

d Final phase configuration at $t = 100$, with final r_1 printed under each ring
