

A Antipodal field on the signed weight axis

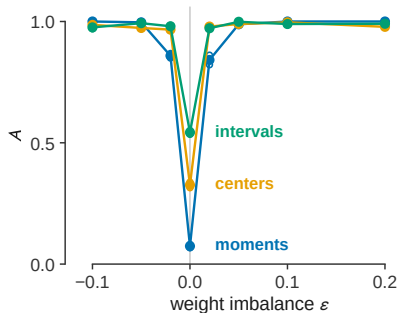

relative-phase mass, $\kappa=6$; the ± 0.02 fields are not visually separable · serialisations in Supplementary Fig. S2

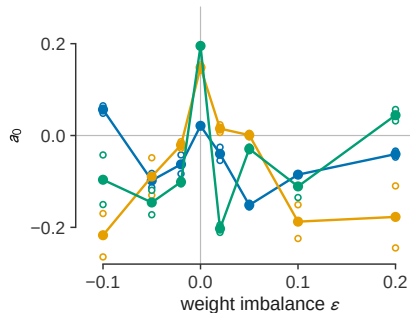

B Operator at exact balance

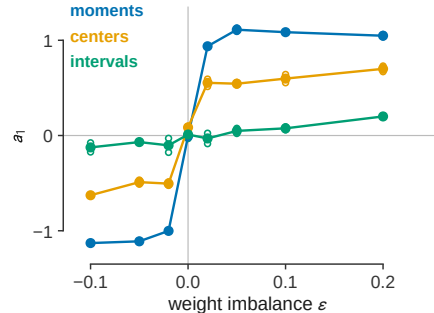

C Activity $A(\varepsilon)$

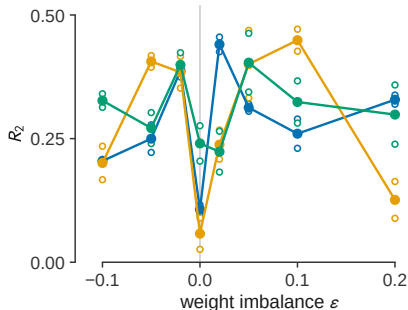

D Signed bias $a_0(\varepsilon)$

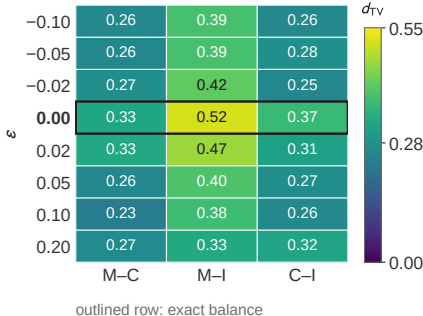

E Signed response $a_1(\varepsilon)$

F Second harmonic $R_2(\varepsilon)$

G Operator d_{TV}

H Near-zero activation
